2

Software Application Support

- ❖ Install, configure and maintain various software, server side and client's machines.
- ❖ Install and maintain peripherals, such as network printers.
- ❖ Integrate hardware and software
- ❖ Upgrade servers and client machines with latest software releases and patches
- ❖ Provide support to end users 24 x 7
- ❖ Provide support to system administrators 24 x7
- ❖ Organize online training seminars for end users within the company on IT matters or software use.

3

Networking System Monitoring

- ❖ Is your network slow?
- ❖ Is the printer turned on?
- ❖ Are your clustered servers up and running?
- ❖ What is your downtime?
- ❖ When is your downtime?
- ❖ Do you have the latest patches and upgrades installed on your machines?

Monitoring services of servers and networks enable you to take proactive actions, to optimize resources, reach higher efficiency and performance.
